Title/Position

Undergraduate in Rajarata University of Sri Lanka

10/2023 - Present

Mihintale, Sri Lanka

Achievements/Tasks

- **Achievements** : Undergraduate students are expected to complete their courses with a satisfactory grade point average, which may vary depending on the program. They are encouraged to participate in research projects, present papers at conferences, and engage in extracurricular activities that contribute to their personal and academic development. Students might also participate in internships and practical training to gain practical experience in their chosen field.
- **Responsibilities** : Undergraduate students are responsible for attending lectures, seminars, and workshops, and for actively participating in classroom discussions and group activities. They are expected to submit assignments and projects on time, follow academic integrity standards, and adhere to the university's code of conduct. Additionally, they are responsible for staying informed about university policies, rules, and regulations.
- **Tasks** : Some common tasks and activities for undergraduate students include conducting literature reviews, writing research papers, participating in group projects, preparing and giving presentations, and taking part in community outreach programs. They may also be involved in organizing and participating in events such as seminars, workshops, and cultural activities organized by the university or student organizations.

SKILLS

Programming and Software Development: Proficiency in programming languages such as Java, Python, C++, or others, along with knowledge of software development methodologies and best practices.

Communication Skills: Strong written and verbal communication skills, as IT professionals often need to communicate complex technical concepts to both technical and non-technical audiences.

Web Development: Proficiency in web development languages such as HTML, CSS, and JavaScript, along with knowledge of web frameworks and content management systems.

GROUP PROJECTS

Automated House Planning And Visualization System For Real Estate (10/2023 - Present)

- **User-Friendly Platform** : We are committed to crafting a web-based platform that is not only intuitive but also inviting for users from all walks of life. Our goal is to ensure that the act of designing a home becomes a delightful and straightforward experience for everyone involved.
- **2D Visualizations** : Going beyond the conventional blueprint, Home Plan AI will offer users 2D visualizations of their prospective homes, providing a tantalizing glimpse into what their dream residence will look like in reality.

CERTIFICATES

Bachelor of Science in Information Technology (BSc IT) (10/2023 - Present)

BSc IT is an undergraduate program focusing on computer-based information systems. It covers programming, database management, networking, and security, with a mix of computer science and business management. Students can specialize in areas like cybersecurity and AI. Graduates pursue careers in software development, IT consulting, and more.
